---

## Summary

System Development Engineer focused on backend automation and operational tooling for large-scale publishing systems on AWS — building AI-assisted workflows and self-serve diagnostics in Java and Python that eliminate manual effort and reduce incident load. Hands-on with core AWS services (S3, DynamoDB, Lambda, CloudWatch, Athena) and an AWS Certified Cloud Practitioner. Quantitative engineering background (geophysics / signal processing) with strong fundamentals in data, noisy systems, and building reliable, maintainable solutions.

---

## Experience

**Amazon (Servicios Comerciales Amazon Mexico)**, System Development Engineer – Mexico City, Mexico June 2026 – present

- Built an autonomous AI agent that scans publisher content-eligibility tickets daily and resolves them without supervision, auto-resolving ~90% and cutting handling time from 30-90 minutes of manual triage to 5-10 minutes of review.
- Automated a manual financial-reporting process covering hundreds of thousands of publishers and records across Amazon's global publishing pipeline, saving ~20 engineer-hours per month via scripted and AI-assisted workflows.
- Codified resolution logic for ~10 recurring failure modes into self-serve automation, cutting missed SLAs by 60% and reducing manual escalations.
- Designed a Git-backed documentation-as-code pipeline that made SOPs peer-reviewable and directly consumable by AI agents.

**Amazon (Servicios Comerciales Amazon Mexico)**, Support Engineer III – Mexico City, Mexico Jan 2024 – June 2026

- Resolved ~1,400 production trouble tickets over 29 months across 4 resolver groups, maintaining 90%+ SLA compliance.
- Owned on-call for the Kindle publisher-reporting backend, resolving 90%+ of pages without escalation.
- Cut repeat self-service marketing tickets ~60% (and recurring tickets ~40% overall) by closing documentation gaps and assigning explicit content ownership.

**Unosquare**, Software Engineer – Remote Aug 2022 – Dec 2023

- Managed database schema changes using SQL, ensuring data consistency and accuracy across multiple systems.
- Built and maintained API test suites for RESTful services using ReadyAPI, working in a Scrum / continuous-delivery workflow.

**Geoexplora**, Geophysical Engineer – Mexico Aug 2019 – Feb 2022

- Automated seismic data-processing workflows with Bash scripting, improving turnaround and accuracy on large datasets.

---

## Education

**BS** **Universidad Nacional Autónoma de México (UNAM)**, BS in Geophysical Engineering – Mexico City, Mexico Aug 2014 – May 2019

- Thesis: Raman Spectroscopy — removing fluorescence noise from digital signals (2020).

**Cert** **Generation Mexico**, Cert in Java Fullstack Development – Mexico Mar 2022 – June 2022

- Intensive Java fullstack bootcamp (Java, Spring Boot, SQL, web fundamentals).

---

## Skills

**Languages:** Java, Python, Bash, SQL, JavaScript

**AWS:** S3, DynamoDB, Lambda, CloudWatch, Athena

**Backend & Data:** REST API design, relational schema design & migrations, automation & scripting, log/metrics-based diagnostics

**Practices:** Incident triage & on-call, documentation-as-code (Git), AI-assisted operational tooling

**Foundational:** Spring Boot, Hibernate

---

## Certifications

- AWS Certified Cloud Practitioner — Amazon Web Services
- Machine Learning — Stanford Online (Coursera)
- Google Data Analytics — Coursera

---

## Languages

**Languages:** Spanish (Native / Bilingual), English (Full Professional — IELTS Academic UKVI)
